

geodyna® 3700
Wheel Balancer

High Performance in Compact Design

The perfect solution for your garages.

geodyna® 3700

RPM Real Plane Measurement Technology

The geodyna® 3700 is a professional video balancer for car, light truck and motorcycle wheels. A perfect solution for garages that want to optimise the working space. Equipped with semi automatic data entry (SAPE) for the distance machine/rim and rim diameter, which saves time and avoid mistakes caused by manual operation and cumbersome calipers.

The geodyna® 3700 balancer is equipped with a 19" colour monitor and a user friendly graphical interface with pictorials, making this balancer extremely easy to use. Adhesive weights can be hidden behind adjacent spokes of alloy rims.

With the optimisation mode, difficult balancing can be easily done on wheel with highly unmatched rim and tyre.

The wheel balancer comes with membrane metal buttons for quick, easy and durable balancer accuracy.

The software built-in with self-diagnostic program minimises the maintenance required.

The machine also features textured surface finish which provide more durable and lasting usage.

Optional accessory: motorcycle adaptor (EAK0221J86A)

Technical Data

Resolution	1g
Measuring speed	200 rpm
Measuring time	6 - 10 s
Rim width (Dynamic)	1" - 16" (3" - 16")
Maximum wheel width	500 mm (400 mm with wheel guard)
Rim diameter	12" - 22"
Maximum wheel diameter	1,016 mm (880 mm with wheel guard)
Data entry	2D SAPE
Maximum wheel weight	65 kg
Power supply	220 - 240V, 1Ph, 50/60 Hz
